

1.Introduction

Helium blimp is a great way to advertise your business, create a landmark or use at a trade show. These giant inflated or blimps are a great eye catcher for the consumer who is walking or driving by. This form of advertising is not only effective but very cost efficient. Increase your sales and build your brand simultaneously.

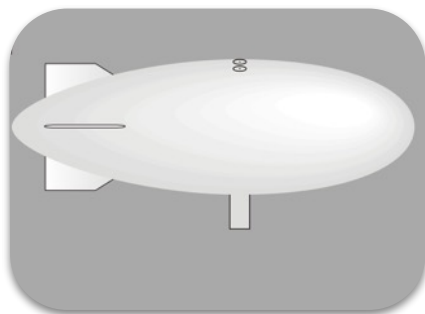

Blimp can be used for outdoor or indoor uses including retail locations, leasing offices, trade shows, festivals, parades and many more. They comes in a variety of sizes and colors, and we work closely with our clients to establish the appropriate model for their business. The helium blimp is made from PVC materials or TPU fabric. All helium blimps come with instruction and a filling valve that is simple to use.

Branding >

Branding can be applied permanently to the Balloon as screen print or off set digital printing at the source of production. Temporary branding can be added as vinyl or Dacron adhesive panels to pre made Balloons.

Please note that not all artwork is possible to apply to the Balloon and samples of proposed artwork should be supplied as soon as possible for review by adballoons.com.cn for sizing and positioning requirements.

Colors >

Background colors of Balloons can be supplied, but this need to check with us if viable

Wind Loading >

We recommend that all of our Balloons can be used in wind loads of up to 30km/h based on the standard ground fixing specified in this document.

Fabrics and Materials >

All the Balloons are constructed from PVC .We also have PU or PU coated fabric but can not be imprinted.

- The material meet EN71, ASTM related standards,can bear low temperature(about -25°C)
- Fireproof meet EN71

Note>

In order to keep same quality for next usage, it is best to packed balloon with paper to slip the print.
